

New online tool available

By creating an online tool for assessing public transport accessibility, we aim to facilitate forecasting public transport accessibility of routes and regions, also fostering transferability and supporting replicability.

For more information and to try out the tool click

Welcome!

Welcome to the SUSTANCE public transport accessibility tool

Start

New mobility app

Aiming to encourage sustainable mobility habits by public transport digitalization, we released a free mobile app for public transport - MOBILITY PLUS. It is covering the Istrian peninsula (Croatia) and is available on Google Play and AppStore.
